

PROFESSIONAL SUMMARY

Computer Science Engineering student and Software Engineer Intern at TwoTheta with hands-on experience building full-stack web applications and AI-integrated products. Experienced in developing applications using **React.js, Next.js, Node.js, Python, JavaScript, PostgreSQL, and MongoDB**, with practical experience in API integration, databases, responsive interfaces, and AI-assisted development. Strong interest in building real-world software products and solving practical problems through technology.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, SQL
Frontend: React.js, Next.js, HTML, CSS
Backend: Node.js, Express.js, REST APIs
Databases: PostgreSQL, MongoDB, MySQL
Tools: Git, GitHub, Docker, Vite
AI: Generative AI, AI-Assisted Development
Design: UI/UX Design

EXPERIENCE

SOFTWARE ENGINEER INTERN — TwoTheta

May 2026 – Present / Hyderabad, Telangana

- Designed and developed MusicChamps, a web application for analyzing music and generating detailed reports.
- Independently built the complete web application and user-facing experience using Next.js, PostgreSQL, HTML, CSS, and JavaScript.
- Took ownership of the application's development, implementation, and UI across the project.
- Worked on building and improving a practical, user-focused product as part of the software engineering team.

PROJECTS

MusicChamps — AI Music Performance Analysis Platform — [Live](#)

Built an AI-powered platform for audio, video, and live performance analysis with automatic instrument detection, performance scoring, AI coaching, contextual chat, progress tracking, and detailed reports using Next.js, TypeScript, PostgreSQL, Vertex AI, and Google Generative AI.

ComplianceGPT — AI-Powered Compliance Review System

Developing an AI-powered compliance pre-review system that analyzes marketing content against a versioned knowledge base, identifies compliance issues with cited sources, and generates compliant rewrite suggestions. Implementing RAG-based grounding, deterministic rule checks, document annotations, audit trails, and REST APIs for enterprise compliance workflows.

DocVault — Role-Based Document Management Platform - [GitHub](#)

Built a secure document management system using React, Node.js, Express, and PostgreSQL. Implemented role-based access control, file and folder management, user authentication, search functionality, and RESTful APIs for document access and administration.

YoLearn-Campus — Full Stack MERN Application - [LiveLink](#)

Built a peer-to-peer skill exchange platform using React, Node.js, Express, and MongoDB. Developed RESTful APIs and implemented backend CRUD operations. Designed MongoDB schemas and integrated frontend with backend services.

EDUCATION

B.Tech – Computer Science Engineering

CMR Institute of Technology | CGPA: 8.89

CCBP 4.0 Academy – Full Stack Development Program

NxtWave

ACHIEVEMENTS

- Best UI Design — Hack Beyond Limits
- Top 10 Finalist — D-Code 2.0 (IIT Hyderabad)
- Qualified Round 2 — Gen AI Exchange Hackathon
- Solved 250+ DSA problems on LeetCode | Active problem solver
